Kareem Abdelmaqsoud

kabdelma@andrew.cmu.edu ♦ www.linkedin.com/kareem-abdelmaqsoud

EDUCATION

Carnegie Mellon University — Pittsburgh, PA
PhD in Chemical Engineering — Aug 2022 – May 2027 (Expected)
Research Advisors: John R. Kitchin & Andrew J. Gellman
Selected Coursework: Data science & ML – Creating Scientific Software – Deep learning – Generative AI

University of Rochester — Rochester, NY
Bachelor of Science - Chemical Engineering — Aug 2018 - May 2022
Research Advisor: Andrew D. White
Selected Coursework: ML for Molecules and Materials – Organic Chemistry – Thermodynamics

INDUSTRY EXPERIENCE

Entos AI (Iambic Therapeutics) — **San Diego, California**
ML Researcher for Drug Discovery — Jan 2022 – July 2022
- Optimizing pretraining and downstream models used for screening by the chemistry and biology teams.
- Implementing new modeling methods from literature and evaluating them on the company internal benchmarks.

LafargeHolcim — **Cairo, Egypt**
Chemical Process Engineering Intern — July-August 2019
- Designed a waste heat recovery system that could reduce the energy need for the plant by 3%.

RESEARCH PROJECTS

Investigating the effect of the DFT settings on the energy target of the OC20 dataset
Carnegie Mellon University — Aug 2023 – current
- Identified data inconsistency issues of the OC20 DFT data that could affect the accuracy of OCP models.
- Showed that removing these inconsistencies would reduce the OCP model errors by at least 40%, bringing the ML accuracy to closer to DFT accuracy.

Modeling the enantiospecific decomposition of tartaric acid over chiral copper surfaces
Carnegie Mellon University — Aug 2022 – Aug 2023
- Developed a physical model that captures the catalyst structure and a mathematical model that captures the symmetry in the data.
- Showed that the two models fit the experimental data well and used them to design the next experiment.
- Currently working on writing a paper for this project.

Meta-learning with graph neural networks for molecular property prediction
University of Rochester — Jan 2021 – Dec 2021
- Combined meta-learning and graph neural networks (GNNs) for learning organic molecules properties.
- Showed that this approach improves the accuracy of GNNs in the few-shot learning regime.

PROFESSIONAL ACTIVITIES & LEADERSHIP

Education Chair, Muslim Student Association – Carnegie Mellon University — Jan 2023 – Current

Poster presentations
- K.Abdelmaqsoud et.al, "Using Machine Learning to Model the Enantiospecific Decomposition of Tartaric Acid on Copper Surface Orientations," presented at the AICHE Conference. Orlando, FL, 2023.
- K. Abdelmaqsoud and E. Chen, "Optimization of Fructose Dehydration over Zeolite Catalysts Using Machine Learning," presented at the AICHE Conference. Boston, MA, 2021.

Teaching assistantship

- Data science & ML — Spring 2024
- Introduction of Chemical Engineering lab — Fall 2023
- Chemical Reaction Engineering — Spring 2023
- Mathematical modeling of chemical engineering — Fall 2022

SELECTED ENGINEERING & BUSINESS PROJECTS

TEDI-London summer school — **Virtual**

Team leader — June-July 2020

- Lead a multinational team designing a mobile application and a device to help people living with dementia.
- The project was ranked the 4th out of 16 teams participating from all over the world.
- Gained the ability to a team of members with different nationalities and different academic backgrounds.

EZ water Startup — **Rochester, NY**

Team leader & researcher — March 2019- March 2020

- The team built a franchise business model and obtained a license for a novel nanofiber membrane filter. The goal was to provide clean water for people living in Pakistan.
- Was selected to represent the US National Academy of Engineering in the Global Grand Challenge Summit in London, September 2019.
- Raised funds to install 10 water projects that will provide free clean water for over 2,000 people living in the remotest villages in Pakistan over the next 10-15 years.

SKILLS

Programming: Python
Frameworks: Kubernetes AWS, git
Deep Learning & Data science: PyTorch, PyTorch Geometric, Tensorflow, Numpy, Pandas, Scikitlearn
Packages: ASE, VASP
Laboratory skills:

- Experience with laboratory equipment including Hydrogen fuel cells, heat exchangers and packed-bed reactors.
- Basic and organic chemistry laboratory techniques, including NMR/IR/UV-VIS spectroscopy, gas and thin-layer chromatography, and crystallization.

HONORS & AWARDS

- 1st Place Award in the Undergraduate Poster Competition at the AIChE conference, Boston, MA.
- Research & Innovation Grant Recipient for my undergraduate research.
- University of Rochester Senior Honoring society
- Tau Beta Pi Engineering Honor Society.
- University of Rochester Dean's List All Semesters.
